Beacon packaging have made the relocation to Aldershot, this enabled the existing extraction system to be updated.

This was upgraded with a fully automated twin compactor arrangement. Cardboard waste is produced by die cutting machines and printer slotter. The floor mounted conveyors feed the card into the suction hoods. The dust from the filters is transferred directly into the compactors via a small fan and cyclone. Since the original system was installed a third filter has now been added to expand the system to cope with additional turnover in cardboard waste.
