APPLICATION

The DE/MS50 Dust Extractor has been designed for use with industrial grade workshop machines producing medium to fine dust, such as linishers, grinders and polishers.

The DE/MS50 is compact, quiet and well made with a robust steel construction, making it perfect for applications across all industry sectors. The robust pleated filter is tough and makes it ideal for handling a wide range of applications. Fire retardant/heat resistant filters are also available for especially tough tasks.

Also available with options such as ATEX Explosion Relief and Heppa Filtration.

FEATURES

- 4.65 m² (50ft²) filter area
- Easy to empty waste collection tray
- Compact and versatile with low noise characteristics
- Suitable for a variety of dust types
- Solid industrial construction

SPECIFICATIONS

Machine Width	766 mm
Machine Depth	887 mm
Machine Height	1180 mm
Filter Area	4.65 m ²
